Smart Spaces Simplified

welcome  
to the **smart** life

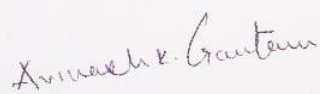

## Smart Spaces Simplified

The always connected ubiquitous smartphones are changing the way we handle various chores of our lives: banking, shopping, news updates, socialising, entertainment and so on. The homes are not untouched by it and next logical thing for home owners is to monitor and control their homes from anywhere.

Welcome to the new era of Smart Homes systems, delivered with care and utmost simplicity to our valued customers!

Being one of the most established players in India, Silvan has earned the credibility of industry leaders like Total Environment, Sobha, Lodha, Tata Housing, Peninsula Group, Nambiar Builders to name just a few. These are the people known for their brand and quality, who choose their partners after rigorous evaluation, sometimes lasting over a year. We have been loved and chosen for what we stand for: Simplicity at its core, providing real value to our customers, and legendary customer support. After establishing ourselves as the leader in home automation for new homes and large projects in India, we are pleased to launch our consumer series of products to our valuable customers who are already living in their houses. Touching various aspects of living such as: Entrance Management, Security, Convenience and Entertainment, this is one of the most comprehensive Smart Home product sets available to our customers. Consumers can enjoy them one at a time, create interesting experiences by using multiple of them, or automate their homes over a period of time as they become accustomed to the concept of automation.

Backed with a large network of retail and installation partners all over India, customers can be assured of world class support.

# Life Is Beautiful With Automated Lighting Solutions

Accentuate your home's  
ambience with smart lighting

## PRODUCT FEATURES

- Allows control over smart devices as well as conventional switches
- Snuggly fits in your existing switchboard\*
- Enables you to control loads from multiple smart devices
- Fault tolerant system
- Define and schedule lighting control
- Enables dimming of light, using 0-10 V dimmable ballasts

## CONVENIENCE SIMPLIFIED

Control and monitor the lights and fans in your house, even while you are outside your home.

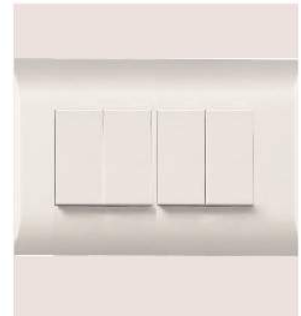

## SPACES SIMPLIFIED

A warm and welcoming home, suitable for all age groups. Use the App or traditional switches.

## SMARTNESS SIMPLIFIED

Create schedules to automatically turn lights ON/OFF for energy savings.

## • Install LUMOS

Behind the switch board

## • Connect CUBO Home Automation Hub

To the home router

## • Configure the system

Using the App

## IT COULDN'T BE ANY SIMPLER

\*LUMOS requires switches to be SPDT (Two way type)

## TECHNICAL SPECIFICATIONS

### LUMOS

- Requires 230V AC input
- Power consumption less than 3W
- Connects to your home router over WiFi
- Dimensions - LxWxD in mm: 111x65x21

### CUBO

- Requires 5V DC input
- Power consumption less than 5W
- Connects to the home router with a LAN cable
- Compatible with Amazon Echo
- Dimension - LxWxD in mm: 117.50x117.50x27

# Music Everywhere

Play your music in any room of your home, with just one touch

## PRODUCT FEATURES

- Stream and play centrally stored music
- One zPLY is required per zone (room)
- Multiple zPLYs can be used in one home to create a true music zoning experience
- Compatible with all types of standard power amplifiers and speakers

### ADD MUSIC TO YOUR LIFE

While you sip your morning coffee and enjoy your favorite songs, your wife can listen to her yoga music in her room.

EACH MEMBER OF THE FAMILY CAN LISTEN TO THEIR CHOICE OF MUSIC IN ANY ROOM OF THE HOUSE.

### CREATE THE PERFECT ZONE

Entertain your guests with ambient music in the living room without disturbing your daughter studying in hers.

## TECHNICAL SPECIFICATIONS

- Requires 230V AC input
- Low power consumption and compact design
- Connects to your home router with a LAN cable or WiFi
- Dimensions LxWxD in mm: 159x110x25

# Be Aware Get Secure

Control and monitor the security of your home from anywhere, anytime.

## PRODUCT FEATURES

- Wireless system, with app-assisted installation
- Supports multiple safety and security sensors
- View your home when you get an alert
- Friends or family members can also receive alerts

## PREVENT DISASTERS

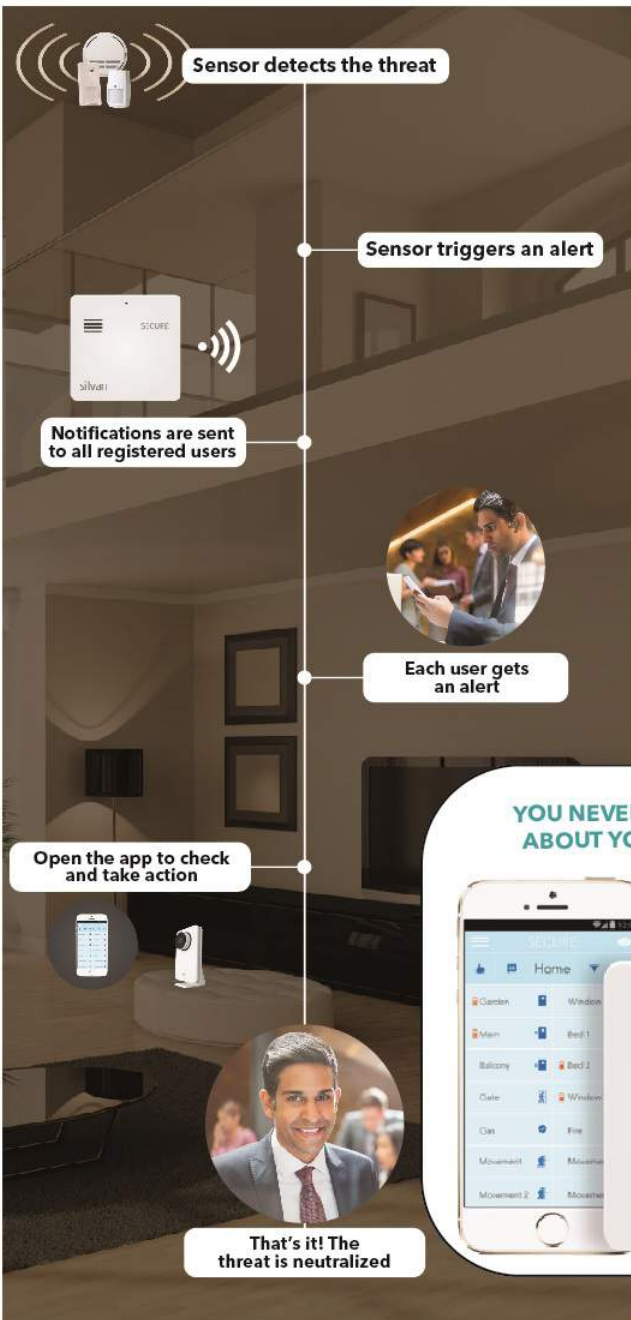

While at the office, the SECURE App notifies you that it has detected a gas leak in your kitchen. You simply call your neighbor and ask him to switch off the gas before any damage is done.

## ALWAYS STAY CONNECTED

During your family vacation in the Maldives, you get a notification on the SECURE App that your back door was opened. You turn on the camera pointing at the door and find two people sneaking into your home. You immediately call the police and the would-be thieves are caught.

## NEVER LEAVE IT TO CHANCE

Landing after a long flight, you receive a call from your neighbour that he received a glass break notification from your home. He checked and found someone breaking in and was able to drive the intruder away. You sigh in relief that you had installed the SECURE App on your neighbour's phone.

**YOU NEVER HAVE TO WORRY  
ABOUT YOUR HOME AGAIN**

**MOTION SENSOR**  
**DOOR INTRUSION SENSOR**  
**HEAT SENSOR**  
**GLASS BREAK DETECTOR**  
**PANIC BUTTON**  
**GAS LEAK DETECTOR**

## TECHNICAL SPECIFICATIONS

- Supports up to 32 sensors
- Requires 230V AC input
- Power consumption 3 Watts
- Power backup using internal battery up to 4 hours
- Connects to your home router over WiFi
- Connects to sensors on 433.92 MHz
- Size LxWxD in mm: 110x110x44

# Smarter Doors Safer Homes

Monitor the entrance of your home from anywhere, anytime

## PRODUCT FEATURES

- View and talk to your visitor through your smart phone
- Unlock your door remotely with the CBELL App
- Motion sensor surveillance provides video alerts if someone is near your door
- Affordable solution for the safety & security of your home
- Easy to set up, retrofit product that you can install yourself

Never miss another delivery. CBELL will connect you to the delivery boy so you can see, hear and speak with him from wherever you are.

Your child reaches home but you're stuck in traffic? Use CBELL's remote unlock feature to open your front door for him while sitting in your car.

No more surprise visits! With the CBELL camera and microphone, always know who is at your front door with just your smart phone.

Worried about burglars breaking into your home? CBELL's motion sensor and night vision detects anyone outside your front door and triggers a video alert to inform you.

- Connects to wireless chime on 433 Mhz
- Dimensions LxWxH in mm: 117x64x23.6

Silvan brings a simple home automation system with smartness that smoothly blends in your day to day life and activities making life simple and more convenient

## Witness A Day In The Life Of A Silvan Smart Family

### HAVE THE PERFECT MORNING, EVERY TIME:

zPLY will wake you to your choice of morning music as LUMOS switches off the terrace and balcony lights and switches on the geyser for you. As you sip your morning tea SECURE disarms the house and switches off the sensors automatically.

### LEAVE YOUR HOME, TENSION FREE:

As you leave for work SECURE arms the house and switches on all sensors while LUMOS switches off all lights and fans so you don't have to worry about a thing.

### ALWAYS BE PREPARED:

Your guests have arrived while you are stuck in traffic. You simply use CBELL to unlock the door and let them into your

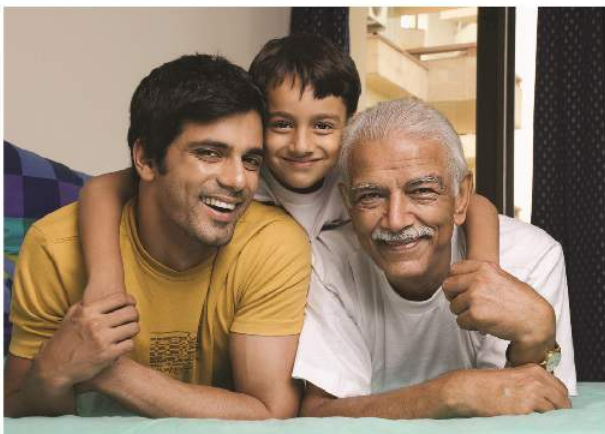

home. SECURE disarms the security system and LUMOS turns on all the lights and fans to make your guests feel welcome.

### CREATE THE PERFECT ATMOSPHERE:

Wow your guests as zPLY plays music in the different zones of your home and synchronizes with LUMOS to adjust the lighting accordingly, all from your smart device. Get more time to socialize with your friends.

### GO TO SLEEP, COMPLETELY AT PEACE:

After a long tiring day, retire for the night knowing that LUMOS will switch off all lights and fans inside the house and SECURE will activate all sensors and arm your home against any intrusions.

### DESIGNED WITH CARE

Each product has been designed keeping an Indian household in mind. Our aim is to help families become 'smart families' through automation while preserving the traditional way of doing things.
